

LEMON CLASS

This month, we have continued our Curricular Goal Learning, as well as learning about Winter. On the coldest days, we have enjoyed exploring ice and snow, both inside and outside. We made our own coloured blocks of ice, and explored them melting in the classroom. We used pipettes and scoops to collect the water into bowls, and talked about what happened when the different coloured ice mixed. We have explored the Immersive Suite in school for the first time, and are learning to use movement to make the pictures on the floor and walls move.
