

Class

October has been a month of exploration and learning for Green Class! They have been doing lots of map work and orienteering in outdoor learning and putting their mapwork knowledge to good use in Discovery where they are learning all about the local area. In Maths they are learning to work with money and at the end of the month they enjoyed the Halloween Shop that was set up in class and pupils were able to experience using money in a real-life scenario. Pupils are also learning about teamwork and how to work and play together. They have experienced playing new games on the playground and board games in the classroom, learning to follow the rules and be kind and fair to each other. They have also been making wonderful dishes in cooking using fruits or vegetables and practicing their chopping, grating, mixing and measuring skills!
