

## Blue class

Blue class have been working in our school community to keep it tidy. They used litter sticks and bags to collect rubbish from the playground. They worked really hard and found lots of things that pupils had dropped. In Science they have been noticing eye colour of their class peers. They went on to make a bar chart to show the information they found. In PDL we have looking at the different types of jobs that adults do in our school. We went around the school to find specific adults and talked about what they do at Hollywater school.
