

## Charcoal Class

Prior to the Easter break, Charcoal class participated in a variety of themed activities - they made a crystalized egg in Science, made a window display with their coloured bunnies in baskets and eggs, and visited the Easter Bunny. Rock Steady came to an end with all our students having had the fantastic opportunity to play a range of instruments - keyboard, drums and guitars seemed more popular than singing. Art this week has the new topic of cityscapes and students are making their own pieces based on famous artists' work. Yoga and golf also finished for the time being and students are practicing their athletic skills for Sports Day.
