

Green class have been exploring the topic 'Up in the Air' this month. They have enjoyed sharing stories about aircrafts, hot air balloons and rockets! They are developing their number skills by learning new strategies to add and subtract. They are also learning about 3D shapes and their properties. In English they are improving their writing skills; learning how to use adjectives in their sentences and create a short narrative. In music they have explored sound maker applications and created their own music. The lovely weather has meant that more time can be spent outside in the sunshine and pupils have been learning to play cricket and work together as part of a team. In cooking they have learned two different techniques to safely chop food; the bridge and the claw. They have made some delicious salads! Horse riding has been an amazing experience and much loved by all the pupils. In Science pupils have been learning about forces and magnets and conducted some experiments on how magnets can attract and repel. In RE they have been learning about the Islamic religion and their beliefs and values. Pupils have also been learning about earthquakes and how Japan has been able to learn from the earthquakes and build stronger buildings. Pupils had a go at designing and making their own buildings with spaghetti and marshmallows! And of course the highlight of this month was being able to visit the FAST museum!

Congratulations to our Stars of the Week this month!
