

Autumn is upon us and we are noticing the changes in the environment. Green class have been doing some outdoor learning, exploring the beauty of the season! They made some potions with food colouring and water, they made amazing dens in our outside area, they made leaf rubbings and autumn colleges. In Food Tech the pupils have been preparing sandwiches and working on their independence to be able to make themselves a sandwich at home. This month we also had a taster session, learning about the food groups and talking about and trying new foods. Everyone has enjoyed the Yoga sessions on Fridays. Pupils demonstrated great focus and skill doing all the different poses and stretches. In Mathematics pupils worked hard at working with fractions and developing their number skills. In Science they explored the force of magnetism and experimented using different materials to see which were magnetic or not. Pupils also did some work with compasses and learned about North, South, East and West. They really enjoyed art as they worked on different crafts using mixed media to make Autumn themed artworks.

Congratulations to our Stars of the Week this month!
